# PU COMMERCIAL PLATES

## PRODUCT OVERVIEW

Coredeluxe PU Commerical Plates are encased in a thick polyurethane coating, with six symmetrical grip holes spaced out around the circumference of each 25LB, 35LB, and 45LB plate. These holes—precision-cut and in close proximity to the raised lip at the edge of the plate—offer athletes a comfortable grip and an easier way to lift, carry, or load a plate from any angle.

Each Coredeluxe PU Commerical Plates includes LB markings, exclusive Coredeluxe branding, and a 2" diameter collar opening for compatibility on any standard Oly barbell. The smaller PU Commerical Plates (2.5LB, 5LB, and 10LB) include a center hole only, without the additional six-hole pattern.

The 25LB, 25LB and 45LB 6-Shooters all feature a 5MM thick PU coating and are built for everyday, high-traffic use. Please note, however, that these are NOT bumper plates and should not be dropped on the floor like a bumper.

## Features

- 1.Unique design makes it more strong than other brand bumper plates.
- 2.Each PU Commerical Plates reach IWF standard.
- 3.Each PU Commerical Plates is much more smoother than High-Temps and they won't wear sooner.
- 4.High quality economic bumper plates with better price. We make use of the best materials than other brand in the market. All PU Commerical Plates are made by in good condition and are pretty precision made in the end.
- 5.Customized available. Making your unique choice of your economic bumper plates.
- 6.Elegant, Long durability and quieter performance.
