COREDELUXE URETHANE DUMBBELLS

PRODUCT OVERVIEW

CoreDeluxe Urethane Dumbbells are available in both 2.5Kg increments up to 80KG and 5LB increments up to 150LB. As an alternative to traditional rubberized bells, this design features solid steel heads with a durable, shock-absorbent urethane plating, fully over-molded to the center. The heads are welded to a 6" straight hardened chrome handle to create a solid, single-piece dumbbell that moves fluidly and compactly and won't damage your flooring on a drop. Each precision-machined handle on CoreDeluxe's Urethane Dumbbells is the same 6" in length and includes a medium-grade knurling for a firm but comfortable grip.

The dumbbell heads vary in diameter and each is finished in a distinct black matte with bright, clear increment markings and the CoreDeluxe logo in grey print. The combination of the urethane plating and textured finish makes these dumbbells uniquely low-maintenance, looking like new even after long periods of use.
